

SAMI RAYMOND UYSAL

PROFESSIONAL SUMMARY

Computer Games Development graduate with a strong foundation in C#, object-oriented programming and software engineering. Experienced in developing AI-driven simulations, debugging complex systems and optimising application performance using Unity. Combined with over five years of leadership experience in hospitality, I bring strong problem-solving, communication, teamwork and attention to detail. Enthusiastic about technology, AI and continuous learning, and eager to contribute to a fast-paced technical environment while continuing to develop professionally.

EDUCATION

Bachelor of Science, Computer Games Development - Upper Second-Class Honours, 09/2021 to 06/2025

University of Westminster

- Software Engineering Principles
- AI for Games (ML & Reinforcement Learning)
- Game Engine & Simulation Systems
- 3D Asset Development

Level 3 National Diploma in Information Technology, 09/2017 to 06/2019

Bsix College

- Triple Distinction

CERTIFICATIONS AND LICENSES

Game Programming and Design with Unity and C#, George Mason University

WORK HISTORY

Service Manager, 10/2025 to current

B Bagel – Soho, London

- Led daily store operations, coordinating staff, prioritising workloads and ensuring efficient service delivery in a fast-paced, high-volume environment.
- Maintained accurate stock control, cash handling and health & safety compliance while ensuring adherence to company procedures and consistently high operational standards.
- Resolved operational and customer issues by making informed decisions under pressure while supporting team performance and maintaining service quality.

Service Leader, 05/2022 to 08/2025

Chipotle – Bank, London

- Supervised daily shift operations, ensuring compliance with company procedures, food safety regulations and consistently high customer service standards.
- Supported the training and development of team members, promoting collaboration, operational efficiency and adherence to company policies.
- Resolved customer and operational issues in a challenging environment by making prompt decisions and maintaining high standards under pressure.

ADDITIONAL INFORMATION

- Languages: English (Fluent), Turkish (Fluent)
- Strong interest in AI, emerging technologies and continuous professional development.
- Currently developing a React portfolio and expanding practical software development skills through personal projects.

TECHNICAL SKILLS

Programming Languages: C#, Python, C++

Technologies & Tools: Git & GitHub, Unity, Unreal Engine, Autodesk Maya, Blender, Adobe Photoshop

Technical Knowledge: Object-Oriented Programming (OOP), Data Structures, Agile Methodologies, Debugging & Troubleshooting

AI & Simulation: Reinforcement Learning, AI Agents, Physics Systems & Vehicle Simulation

PROJECTS

AI Racing Simulation – Unity & ML-Agents

- Developed an AI racing simulation in Unity using ML-Agents and reinforcement learning to train autonomous vehicle behaviour.
- Optimised physics-based vehicle controls and AI performance through testing, debugging and analysis of training outcomes.

Multiplayer Prototype – Unity

- Developed a multiplayer game prototype in Unity using C#, implementing core gameplay mechanics and networked player interactions.
- Debugged gameplay systems resolved technical issues and used Git for version control throughout development.
